

Email Help Guide

What is Email?

Email is as simple and straight forward as writing a letter, but the technical definition would be: Email, e-mail or electronic mail is the transmission of messages (emails or email messages) over electronic networks like the internet. Don't let this intimidate you. We are here to help.

Why does the Chickasaw Nation require an email address from you?

We value your privacy and we will not send irrelevant emails that you haven't authorized, nor will we sell your email address to any third party.

The Chickasaw Nation needs the ability to quickly reach you with items in relation to your Chickasaw Services account, or for any automatic notifications you choose, and to keep you up to date with all of the current happenings.

We also need your unique email address when registering to assure you only register one account.

How can you get an email address?

There are dozens of websites available that will allow you to create a free email account. A few of our favorites are listed below:

1. Google Email: mail.google.com
2. Yahoo Email: mail.yahoo.com
3. Microsoft Outlook: login.live.com

If you need any guidance regarding these, please let us know. We are here to help! You may contact our Service Desk at (580) 436-7298.
